

I design **products** – and the AI workflows that change how teams ship them.

A designer who thinks in systems: I treat AI as a working material, prototype patterns in code, and scale what holds up.

Experience

Lead Product Designer @ [Workable](#) REMOTE January 2022 – Present

- Led the product design of Workable's newest feature cluster, Talent Management.
- Defined design operations and quality assurance processes
- Orchestrated a team of 4 Product designers
- Collaborated directly with C-level stakeholders to define new product's vision.
- Contributed to the Evergreen design system and the design team's processes.

Product Designer @ [Bestprice.gr](#) REMOTE October 2020 – December 2021

- Progressively built the product's design system from scratch.
- Reported directly to the Head of Product.
- Defined the architecture and design of new or updated features, such as the latest Review system of the product.

Product Designer @ [VisualEyes](#) HYBRID October 2019 – October 2020

- Led the product design and vision of the web app of VisualEyes, as the 2nd senior hire.
- Worked in defining the overall user experience of the product.
- Created design system and visual language guidelines.
- Tracked product growth and user behaviour. User interviews, user testing sessions.

UX/UI Designer @ Freelance March 2016 – September 2019

- Multiple projects for both web and mobile platforms.
- International clients
